

Claim Migration Lab Classroom Run Kit

TOK Cognitive Science Activity Bank • Cross-AOK • 35-45 min

Category	Cross-AOK	Time	35-45 min
Difficulty	Medium	ID	claim-migration-lab

Big idea: A claim can change meaning and justification when it migrates between knowledge contexts.

One-Minute Teacher Brief

Students move one knowledge claim across several AOKs and watch how evidence standards and language must change.

Student Prompt

Inspect Claim Migration Lab Stimulus A. Record one first claim, the evidence you used, your confidence, and what would make you revise.

Concrete Stimulus Packet

Claim Migration Lab Stimulus A	Student-facing stimulus 1: Claim: 'This pattern is meaningful' in mathematics, natural sciences, arts, and history. Name the AOK, the method being used, and the standard of evidence you would apply.	Students inspect this exact card first and commit to a claim before hearing anyone else.
Claim Migration Lab Stimulus B	Student-facing stimulus 2: Claim: 'This explanation is reliable' in human sciences, history, and technology. Name the AOK, the method being used, and the standard of evidence you would apply.	Use this for comparison, a second round, or a partner challenge.
Claim Migration Lab Reveal / Twist	Student-facing stimulus 3: Claim: 'This explanation is reliable' in human sciences, history, and technology. Name the AOK, the method being used, and the standard of evidence you would apply.	Teacher reveal: connect the changed response to the big idea — A claim can change meaning and justification when it migrates between knowledge contexts.

Actual Lesson Questions

#	Question for students	Teacher key / cue
1	After inspecting Claim Migration Lab Stimulus A, what is your first knowledge claim?	Teacher cue: look for a clear claim, not just a description.
2	Which exact detail from Claim Migration Lab Stimulus A did you use as evidence?	Teacher cue: students should name visible words, data, source features, method features, or contextual clues.
3	What did you infer beyond the evidence?	Teacher cue: this is where assumptions, framing, models, or perspective usually appear.
4	How confident are you: 50%, 60%, 70%, 80%, 90%, or 100%?	Teacher cue: confidence is data for the debrief, not a grade.
5	What missing information would most improve the knowledge claim?	Teacher cue: push for method, source, context, comparison, or definitions.

#	Question for students	Teacher key / cue
6	What changes when a claim moves between AOKs?	Teacher cue: students should move from the classroom example to a general TOK issue.

Student Task

Use the stimulus cards to complete the observation/inference/evidence/confidence grid, then answer one TOK knowledge question connected to Cross-AOK.

Teacher Key / Reveal

The key move is not the “right answer”; it is the moment students see how a claim can change meaning and justification when it migrates between knowledge contexts.

- Strong response: separates observation from inference.
- Strong response: names a method, source, model, language choice, context, or perspective.
- Strong response: revises confidence when new evidence or a new criterion appears.
- Weak response: gives only opinion or says “it depends” without criteria.

Student Instructions

- Work silently for the first response so you can notice your own starting point.
- Record one knowledge claim, the evidence behind it, and your confidence level.
- After the reveal or comparison, update your claim in a different colour or column.
- Use the debrief to answer: What changes when a claim moves between AOKs?

Setup Checklist

- Choose claims with flexible wording so they can plausibly move between AOKs.
- Make students revise the claim, not just relabel the evidence.

Example Stimuli or Materials

- Claim: 'This pattern is meaningful' in mathematics, natural sciences, arts, and history.
- Claim: 'This explanation is reliable' in human sciences, history, and technology.

Resources To Use

- Resource pack: <resources/claim-migration-lab/index.html>
- Card deck CSV: <resources/claim-migration-lab/cards.csv>
- Visual prompt: <resources/claim-migration-lab/visual-prompt.svg>
- AOK migration grid: claim wording, evidence standard, method, uncertainty, revised claim.
- AOK cards listing typical evidence and caution points.

Run Sequence

1. Choose one broad claim and place it in one AOK context.
2. Students identify what evidence would justify the claim there.
3. Move the same wording to a second and third AOK context.
4. Groups revise the claim so it fits each new context responsibly.
5. Debrief why claims cannot always travel unchanged.

Debrief Moves

- Knowledge question: What changes when a claim moves between AOKs?
- Are words like evidence, explanation, and reliability stable across knowledge contexts?
- How can interdisciplinary work avoid flattening differences?

Teacher Quick Script

- The same sentence may not make the same knowledge claim in a new AOK.
- What has to change so the claim becomes responsible in this context?

Exit Ticket

- One thing I first treated as evidence was...
- My confidence changed because...
- A better knowledge question I can now ask is...
