

One Image, Many Readings Teacher Notes

TOK Cognitive Science Activity Bank • The Arts • 30-40 min

Category	The Arts	Time	30-40 min
Difficulty	Medium	ID	one-image-many-readings

Big idea: Evidence in interpretation is plural.

Overview

Students practise evidence-based interpretation from multiple lenses.

Student Prompt

Inspect One Image, Many Readings Stimulus A. Record one first claim, the evidence you used, your confidence, and what would make you revise.

Concrete Stimulus Packet

One Image, Many Readings Stimulus A	Student-facing stimulus 1: One ambiguous image interpreted through personal, cultural, political, and formal lenses. Describe what you see or hear first, then add title/context and revise the interpretation.	Students inspect this exact card first and commit to a claim before hearing anyone else.
One Image, Many Readings Stimulus B	Student-facing stimulus 2: A gallery walk where each group leaves a different reading. Describe what you see or hear first, then add title/context and revise the interpretation.	Use this for comparison, a second round, or a partner challenge.
One Image, Many Readings Reveal / Twist	Student-facing stimulus 3: A claim-evidence-context triangle for art interpretation. Describe what you see or hear first, then add title/context and revise the interpretation.	Teacher reveal: connect the changed response to the big idea — Evidence in interpretation is plural.

Actual Lesson Questions and Key

#	Question for students	Teacher key / cue
1	After inspecting One Image, Many Readings Stimulus A, what is your first knowledge claim?	Teacher cue: look for a clear claim, not just a description.
2	Which exact detail from One Image, Many Readings Stimulus A did you use as evidence?	Teacher cue: students should name visible words, data, source features, method features, or contextual clues.
3	What did you infer beyond the evidence?	Teacher cue: this is where assumptions, framing, models, or perspective usually appear.
4	How confident are you: 50%, 60%, 70%, 80%, 90%, or 100%?	Teacher cue: confidence is data for the debrief, not a grade.
5	What missing information would most improve the knowledge claim?	Teacher cue: push for method, source, context, comparison, or definitions.
6	Is ambiguity a weakness or strength in the arts?	Teacher cue: students should move from the classroom example to a general TOK issue.

Teacher Key / Reveal

The key move is not the “right answer”; it is the moment students see how evidence in interpretation is plural.

- Strong response: separates observation from inference.
- Strong response: names a method, source, model, language choice, context, or perspective.
- Strong response: revises confidence when new evidence or a new criterion appears.
- Weak response: gives only opinion or says “it depends” without criteria.

Setup Checklist

- Prepare a starter stimulus using: One ambiguous image interpreted through personal, cultural, political, and formal lenses.
- Print or project the student response grid before the activity begins.
- Plan a private first-response moment before any group discussion.

Ready-to-Use Examples

- One ambiguous image interpreted through personal, cultural, political, and formal lenses.
- A gallery walk where each group leaves a different reading.
- A claim-evidence-context triangle for art interpretation.

Suggested Timing

Stage	Teacher move	Watch for
1	Assign lenses: emotional, political, historical, technical, feminist, religious, personal, formal composition.	Assumptions, confidence shifts, evidence claims, and language choices.
2	Groups produce a reading using at least three pieces of evidence from the work.	Assumptions, confidence shifts, evidence claims, and language choices.
3	Groups compare compatible and incompatible interpretations.	Assumptions, confidence shifts, evidence claims, and language choices.
4	Create class criteria for a strong interpretation.	Assumptions, confidence shifts, evidence claims, and language choices.
Debrief	Move from the activity result to a TOK knowledge question.	Students distinguishing method, evidence, interpretation, and overclaiming.

Teacher Language

- Write your first judgement before we discuss it; the first answer is useful evidence.
- Separate what you noticed from what you inferred.
- What would make this knowledge claim more reliable?

Common Misconceptions

- Students may treat interpretation as purely subjective and therefore beyond evidence.
- Students may ignore how context, form, and audience knowledge constrain readings.

Assessment Look-Fors

- Supports interpretation with formal features, context, and audience response.
- Explains why multiple readings are not automatically equal.

Differentiation and Adaptations

- Short lesson: use only the first example, one response grid, and one debrief question.
- Long lesson: add a second round where students revise the method and compare outcomes.
- Low-tech option: run with printed cards, sticky notes, and a board tally.

Extension Tasks

- Design a second version of the activity that tests the same knowledge issue in another AOK.
- Find a real-world example where the same knowledge problem matters outside the classroom.
- Write a 150-word TOK exhibition-style commentary using the activity as the object context.
